

Snow Day Activities P2

Maths

Snowman Shapes

1. Draw 2 circles, on whitepaper, and cut them out to make a snowman. Glue down on coloured paper then draw and stick on other features. Include as many 2D shapes as you can.
2. Can you name your snowman?

Snow Sculpture/3D Shapes

- Which 3D shapes can you make in the snow using old containers that you have at home?
- Can you create a sculpture or model?

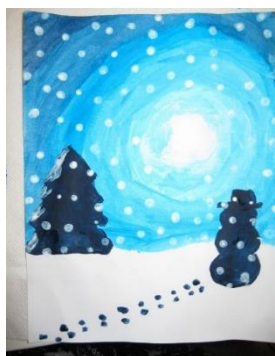

Art

Create a Snowy Picture

Paint a picture or create a paper mosaic artwork. Here are some ideas:

- The Christmas tree in your house
- The snowman in your garden
- Snowy landscape outside your window

Art

Frozen sun catcher

1. Collect leaves, flowers and twigs
2. Fill a small bowl or cooking tin with water
3. Create a design in the water using your twigs, leaves and flowers
4. Leave it outside to see if it will freeze
5. Place in your freezer if not cold enough outside
6. Drill a small hole and tread ribbon through
7. Hang in your garden

Literacy

Write About Your Snowy Day!

[t-t-16677-snow-day-write-up-sheet_ver_1.pdf](https://www.twinkl.co.uk/resources/primary/primary-1-2/primary-1-2-literacy/primary-1-2-literacy-activities/primary-1-2-literacy-activities-16677-snow-day-write-up-sheet-ver-1.pdf)
([twinkl.co.uk](https://www.twinkl.co.uk))

Snow Themed Reading

Read a snow themed storybook or watch/listen to a story online. Share a photo of yourself reading the book and/or draw a picture of your favourite part/page.

SNOWMAN Spelling

Make as many different words out of the word 'Snowman' as you can. You can use letters from the word more than once.

Five senses

Go on a winter walk (or play in your garden) and talk about the five senses. Write a list of the things you can:

1. See
2. Smell
3. Feel
4. Hear
5. Taste

Science

Snow Volcano

Can you create a snow volcano? See the instructions below. Have fun!

SNOW VOLCANO

You'll need

2 spoonfuls of baking soda (bicarbonate of soda)
1 spoonful washing up liquid (dish soap)
A few drops of red food colouring
30 ml vinegar
Spoon
Snow
Small container

Instructions

Add everything except the vinegar to the container and stir well.

Carefully shape a volcano shape around the container using snow.

Add the vinegar and watch as the volcano erupts! If it doesn't work very well, add a bit more washing up liquid and vinegar and stir again.

Why does it work?

Vinegar (an acid) and bicarbonate of soda (an alkali) react together to neutralise each other. This reaction releases carbon dioxide, a gas which is the bubbles you see. The bubbles of gas make the washing up liquid bubble up to give a lovely thick lava!

Science Sparks™
Adult supervision required. You are responsible for your own safety.

STEM

Toy Sledge

Build a sledge for a small toy using household materials. Share a photo of your masterpiece!

Outdoor Learning

Take Photographs of Signs of Winter:

1. Icicles
2. Frosty grass
3. Snow on the ground
4. Frozen puddles
5. Can you take a photo of your cold breathe?

PE

Yoga
